

The SAP HCM Strategic Roadmap Workshop

In these challenging times, ROC can help you clarify your strategic vision:

- Has your organization evolved or modified its direction since your initial SAP HCM implementation? Or will the direction require change in the near future?
- Are you concerned that your investment in SAP HCM is not delivering its full benefits or returns?
- Has your SAP HCM landscape not kept pace with changing organizational demands?
- Is your environment up to date and leveraging the latest features, functions and technologies?
- Are you aware of the latest trends, business models and options available for the ongoing support of your HR and IT functions?
- Do you need guidance to consolidate, upgrade, integrate solutions or adopt new technologies?

How would you benefit from an SAP HCM Strategic Roadmap?

ROC, the leading SAP HCM consultancy, will provide a comprehensive, objective analysis based on our experience implementing leading practices in over 500 SAP HCM projects.

Making HCM a Business Priority

Our Approach:

We all need a Roadmap. When the path is clear, the journey is easier. Companies can mobilize around a vision and are more likely to be successful, delivering maximum value to their stakeholders.

However, the route may change as the business environment changes. SAP has recognized this and is evolving too. Companies must constantly assess how these changes and new developments impact them.

ROC's SAP HCM Strategic Roadmap Workshop is designed to help you.

The SAP HCM Strategic Roadmap Approach:

ROC will conduct an in-depth telephone interview to determine your key priorities. We will then facilitate a half-day workshop based upon these priorities. At this workshop, ROC's industry-leading consultants will:

- Analyze your current challenges and future HR business needs
- Gain an understanding of your technology landscape and its impact upon the HR function and your employees
- Educate you on the current business trends and advances in technology applicable to your organization and its priorities
- Identify the opportunities and options open to your business, supported by the potential quantitative/qualitative benefits
- Build a high-level HCM business/technology roadmap
- Combine initiatives into releases, in order to create a clear "step-by-step" guide to achieving your vision

Your Business Potential Realized:

The findings and recommendations within the SAP HCM Strategic Roadmap are based on your organizational priorities, factors of ease-of-implementation and the potential benefits. The importance of this approach is that, as each recommendation is implemented, it builds on the previous solutions to progressively deliver the transformation required to support your corporate vision.

The ROC SAP HCM Strategic Roadmap Workshop is generally provided at no charge.
